

The Euro-Atlantic Security and the Security in the Cyberspace Conference Review

Ioan-Cosmin MIHAI

Vice President of RAISA - Romanian Association for Information Security Assurance

The Euro-Atlantic Security and the Security in the Cyberspace Conference was held on April 22, 2015 by the Centre for Security Studies, Crisis Management and Conflict Prevention and iBusiness Company in collaboration with the Faculty of Security from National Defense University “Carol I” at National Military Club in Bucharest.

The main purpose of the conference was to bring to the round table the experts in cybersecurity, the discussions focusing on data security, strategies and the importance of public and private sectors in cybersecurity field.

The event was addressed to IT managers and CIOs from major private and public companies, representatives of Parliament and those involved in related policies of government structures. The issues and debates focused on Romanian cybersecurity infrastructure.

The importance of the conference was underlined by the ideas of prestigious speakers invited from universities, Romanian Intelligence Service, Romanian National Computer Incident Response Team (CERT-RO), European Agency for Network and Information Security (ENISA) and from important professional associations.
