

# **BlackHat USA 2015**

**Ionuț-Daniel BARBU**

University Politehnica of Bucharest, Romania

**BlackHat USA 2015 was a six-day event that took place in Las Vegas, Nevada, USA. Romanian Association for Information Security Assurance was represented by Ionuț Daniel Barbu. This 18th occurrence of the conference contains a series of both technical and non-technical talks on various aspects of Information Security.**

This international event targeted the information security enthusiasts at various experience levels from security analysts and engineers to consultants and executives. Among the over 100 hundred talks it is worth highlighting the presence of Charlie MILLER and Chris VALASEK discussing the Remote Exploitation of an Unaltered Passenger Vehicle.

Apart from this, the conference included interesting talks and subjects on malware, honeypots, hashing, online banking, threat intelligence, big data, vulnerabilities, security of mobile applications, intrusion detection systems, social engineering and much more. Needless to say, there was a large vendor area with interesting proof of concepts from Qualys, Cisco, RSA, HP Enterprise Security, F5, Imperva, PaloAlto, LogRhythm, Bit9+Carbon Black, Websense, Lockheed Martin, FireEye, Tenable, CloudPassage etc.
