

CERT-RO International Conference: New Global Challenge in Cyber Security

Ioan-Cosmin MIHAI
Romanian Association for Information Security Assurance

The 6th edition of the annual conference “New Global Challenges in Cyber Security” was organized by CERT-RO (Romanian National Computer Security Incident Response Team) on October 03-04, 2016.

The event was held under the aegis of the European program “European Cyber Security Month” and it addressed themes from cybersecurity field like initiatives and best practices for information security, challenges and developments on cybersecurity.

The conference brought together cybersecurity experts, delegates from the private sector, NGOs and academic institutions with responsibilities in dealing with incidents of cyber security, and CERT institutions from South Korea, Ukraine, Estonia, Moldova, Serbia and Montenegro.

Speakers of international notoriety as Eugene Kaspersky, Ramses Gallego, Robert Kosla or Peter Traven initiated interesting and constructive debates with the participants from the public.

In the context of alarming increase of number of cyber-attacks, the conference was an important event in the field of cybersecurity, discussions being held on various topics of cybersecurity such as: monitoring botnet networks, intelligent cybersecurity strategies, and systems security solutions.
